

Public Sector Challenges

Amendments to Bill C-65 created a new resolution process with ripple effects for our public sector clients. Understanding and applying legislative changes in real time is costly and risky for departments and teams. With numerous stakeholders including Workplace Health & Safety Committees, unions, employees, vendors, and subcontractors it is imperative that public sector clients work with suppliers who stay abreast of changing legislation. QMR quickly identifies legislative changes, emerging jurisprudence and new developments in case-law and institutionalizes the changes, providing best practices, recommendations and guidance in real time.
